

NVR and Camera Upgrades

Philadelphia, PA
Client: Non-Public Schools

Project Description:

Admiral Integration provided a comprehensive security system upgrade that included the installation of new Hanwha network video recording and camera equipment, along with all necessary mounts, wiring, and configuration.

The scope of work enhanced overall video coverage, recording capacity, and system performance while optimizing existing camera placement for improved visibility.

Project was part of the PA Pennsylvania Targeted School Safety Grants.

Services Provided:

- Supplied and installed Hanwha 32-channel Network Video Recorder (NVR) with 16TB storage capacity
- Installed multi-sensor, multi-directional Hanwha cameras for expanded coverage and flexibility
- Mounted all cameras using compatible wall and corner mounting hardware
- Installed and terminated new CAT6 plenum-rated cabling for camera connectivity
- Completed full system setup, testing, and configuration to ensure reliable operation
