# Wave Server and Camera Upgrades

Philadelphia, PA

Client: Non-Public Schools

Project Description:

Admiral Integration provided and installed all necessary equipment, materials, and labor to complete the Wave Server and Camera Upgrade project at this non-public school in Philadelphia, PA.

This upgrade enhanced the existing video surveillance infrastructure, improved image quality, and ensured efficient system management through the Hanwha Wisenet WAVE platform.

Project was part of the PA Pennsylvania Targeted School Safety Grants.

Services Provided:

- Installation of 3 Hanwha cameras using appropriate mounting accessories, including corner mounts, wall-mount arms, and pendant caps for secure, professional placement.

- Deployment of Hanwha WAVE-PRO-24 software license to support up to 24 IP cameras, allowing seamless integration, recording, and management.

- Installation of CAT6 plenum-rated cabling and all necessary wiring and connectors for optimal network performance.

- System setup, configuration, and verification to ensure full functionality, clear image quality, and proper integration with the existing Wave Server.
